

R-50-3A自动锁钉机

主要功能&特征

1. 伺服马达锁钉，扭力和转速可按要求精准调节；
2. 锁钉精准：机器共可锁3颗螺丝，锁螺丝前，可用跟模固定好鞋子，避免鞋子晃动、螺丝打不准；
3. 自动分钉：螺丝钉可自动分钉、下钉、锁钉；
4. 节省人工：鞋子不用预先打孔，可直接锁跟，根据产量可节省1-2个工人；
5. 节省材料：不易爆跟，大大减少了鞋跟的浪费；
6. 节省耗材：人工锁跟钻头很容易损坏，机器带有保护钻头的功能；
7. 锁跟更牢固：机器使用气缸力度将螺丝钉旋转锁入鞋跟，气缸的压力和扭力均可调整，也可根据鞋跟的大小来调节打钉头的倾斜度，锁跟牢固度更高；
8. 操作简单：可关闭任一螺丝，锁螺丝的顺序也可根据需要来设定；
9. 降低操作者工作强度：机器操作简单，调整便捷，低噪音，极大地降低了工作强度；
10. 可选装置：可同时使用2种不同长度的螺丝钉。

Main Functions&Features

- 1.Screw fixing by servo motors,while its torsion & speed can be sdjusted precisely according to the request.
- 2.Precise Screw Fixing: The machine can lock 3 screws in total. Before locking the screws, the shoes can be fixed with the mold to avoid the shoes shaking and the screws being inaccurate;
3. Automatic Screw Feeding/Dispatchng:With the screw loader,the screw can be automatically dispatched,feed and fixed in the heel;
- 4.Saving Labors:No need to punch holes on insole,can directly put screws in the heel,based on the output,can save1-2 workers;
- 5.Saving Materials:With this machine,heel break is much less comparing to manual m/c,thus no waste of heels;
- 6.Saving Consumption Material:The m/c is with screw driver protecyng system,while with manual m/c,the screw driver is easily/frequently broken;
- 7.More Stable Heel Fixing:The m/c is turning the screw in the heel by one cylinder,while its pressure and torsion can both be adjusted.The head inlination can be adjusted based on different heel size too;thus the screw can be more stably fixed on the heel;
8. Easy Operation:Can close any screw you want,and the screw sequence can also be set based on request;
- 9.Decreasing the Operator's Workload:Easy operation,convenient adjustment,low noise,greatly decreased the operator's workload;
- 10.Opltional:Use 2 different size screws simultaneously.

技术参数 TECHNICAL DATA

长度 Length	MM	800
宽度 Width	MM	800
高度 Height	MM	1850
净重 Weight	KG	400
平均功耗 Average Electrical Consumption	KW	0.5
空气消耗 Air Consumption		100NL/Min
产量 Output	Pairs	1200~2200双/8H
